Matrix input

Description

Creates an adjustable-length matrix input.

Usage

```
matrixInput(inputId, label, data)
```

Arguments

inputId Input variable to assign the control's value to.

label Display label for the control.

data The initial values to use for the matrix.

 ${\tt QRAGadget}$

A 'Shiny' Gadget for Interactive QRA Visualizations.

Description

Upload raster data and easily create interactive QRA visualizations. Select from numerous color palettes, basemaps, and different configurations.

Usage

```
QRAGadget()
```

Value

A standalone html file

Examples

```
if (interactive()) {
  QRAGadget()
}
```
