Package 'postdoc'

September 30, 2024

Type Package

Title Minimal and Uncluttered Package Documentation

Version 1.4.0

Description Generates simple and beautiful one-page HTML reference manuals
with package documentation. Math rendering and syntax highlighting are done
server-side in R such that no JavaScript libraries are needed in the
browser, which makes the documentation portable and fast to load.

render_package_manual   *Generate HTML reference manual*

Description

Renders complete package reference manual in HTML format.

Usage

```
render_package_manual(package, outdir = ".", link_cb = r_universe_link)

render_base_manuals(outdir = ".")

r_universe_link(package)
```

Arguments

package	name of the package
outdir	where to put the html file
link_cb	callback function which can be used to customize hyperlinks to other packages. This function gets invoked when a help file contains links to another package, and should return the URL to the html reference manual for this other package. Set to NULL to drop cross-package links.

Details

Math rendering and syntax highlighting are done server-side in R such that no JavaScript libraries are needed in the browser, which makes the documents portable and fast to load.

Value

path to the generated html document

Examples

```
htmlfile <- render_package_manual('compiler', tempdir())
if(interactive()) utils::browseURL(htmlfile)
```
