

Package ‘eduResearchR’

October 2, 2026

Type Package

Title A Collection of Educational Datasets for Research and Statistical Analysis

Version 0.1.0

Maintainer Jorge Luis Marmanillo Santana <jlmarmanillo@gmail.com>

Description Curates a comprehensive and robust collection of 15 classic educational, economic, and social science datasets meticulously tailored for empirical research, project-based learning, and academic instruction in higher education. It streamlines exploratory data analysis, business intelligence modeling, regression techniques, and hypothesis testing by providing ready-to-use data structures sourced from prominent community packages (Kleiber and Zeileis (2008) <<https://CRAN.R-project.org/package=AER>>; Fox and Weisberg (2019) <<https://CRAN.R-project.org/package=carData>>).

Encoding UTF-8

LazyData true

Depends R (>= 4.1.0)

Suggests ggplot2, testthat (>= 3.0.0), dplyr, knitr, rmarkdown

Config/testthat/edition 3

VignetteBuilder knitr

Config/roxygen2/version 8.1.0

NeedsCompilation no

Author Jorge Luis Marmanillo Santana [aut, cre] (ORCID: <<https://orcid.org/0009-0003-4485-0744>>),
Christian Kleiber [ctb] (Author of the AER package; original source for CASchools and CollegeDistance.),
John Fox [ctb] (Author of the carData package; original source for

EducationLiteracy, ExamScores, and FirstYearGPA.),
Douglas Bates [ctb] (Author of the MEMSS package; original source for
MathAchieve.),
Thomas Lumley [ctb] (Author of the survey package; original source for
apipop.),
Jeremy Finn [ctb] (Principal investigator; original source for STARplus
(Project STAR).),
Andrew Raudenbush [ctb] (Researcher; original source for the classroom
dataset.)

Index	11
--------------	-----------

apipop	<i>apipop Dataset</i>
--------	-----------------------

Description

Student performance in california schools.

Usage

apipop

Format

Data frame: 6,194 rows, 37 variables.

Source

Academic Performance Index, provided via the survey package (Thomas Lumley).

Examples

```
data(apipop)
head(apipop)
```

CASchools	<i>CASchools Dataset</i>
-----------	--------------------------

Description

California test score data.

Usage

```
CASchools
```

Format

Data frame with district-level educational data.

Source

Extracted from the AER package (Christian Kleiber & Achim Zeileis), based on Stock and Watson.

Examples

```
data(CASchools)
head(CASchools)
```

classroom	<i>classroom Dataset</i>
-----------	--------------------------

Description

classroom data in Chapter 4 of the study of Instructional Improvement.

Usage

```
classroom
```

Format

Data frame: 1,190 rows, 12 variables.

Source

Study of Instructional Improvement, research contributor Andrew Raudenbush.

Examples

```
data(classroom)
head(classroom)
```

CollegeDistance	<i>CollegeDistance Dataset</i>
-----------------	--------------------------------

Description

Data on high school seniors and college attendance decisions.

Usage

```
CollegeDistance
```

Format

Data frame with student-level educational and economic variables.

Source

Econometric data source via the AER package (James H. Stock).

Examples

```
data(CollegeDistance)
head(CollegeDistance)
```

EducationLiteracy	<i>EducationLiteracy Dataset</i>
-------------------	----------------------------------

Description

Education and literacy survey metrics.

Usage

```
EducationLiteracy
```

Format

Data frame with social science indicators.

Source

Extracted from the carData package (John Fox).

Examples

```
data(EducationLiteracy)
head(EducationLiteracy)
```

ExamScores

ExamScores Dataset

Description

Student exam performance metrics.

Usage

ExamScores

Format

Data frame with academic scores and variables.

Source

Extracted from the carData package (John Fox).

Examples

```
data(ExamScores)
head(ExamScores)
```

FirstYearGPA

FirstYearGPA Dataset

Description

Academic performance data tracking first year university GPA.

Usage

FirstYearGPA

Format

Data frame with student performance metrics.

Source

Extracted from the carData package (John Fox).

Examples

```
data(FirstYearGPA)
head(FirstYearGPA)
```

MathAchieve	<i>MathAchieve Dataset</i>
-------------	----------------------------

Description

Mathematics achievement scores.

Usage

MathAchieve

Format

Data frame: 7,185 rows, 6 variables.

Source

High School and Beyond study, processed via the MEMSS package (Douglas Bates).

Examples

```
data(MathAchieve)
head(MathAchieve)
```

NELS	<i>NELS Dataset</i>
------	---------------------

Description

National Education Longitudinal study (NELS) of 1988.

Usage

NELS

Format

Data frame: 500 rows, 48 variables.

Source

National Center for Education Statistics (NCES).

Examples

```
data(NELS)
head(NELS)
```

pisausa

pisausa Dataset

Description

International student assessment data for the USA.

Usage

```
pisausa
```

Format

Data frame with assessment scores and demographics.

Source

OECD Programme for International Student Assessment (PISA).

Examples

```
data(pisausa)
head(pisausa)
```

school

school Dataset

Description

Institutional metrics and school performance indicators.

Usage

```
school
```

Format

Data frame with institutional data.

Source

U.S. Department of Education (College Scorecard metrics).

Examples

```
data(school)
head(school)
```

schoolProgram	<i>schoolProgram Dataset</i>
---------------	------------------------------

Description

Educational programs and institutional offerings data.

Usage

```
schoolProgram
```

Format

Data frame with program characteristics.

Source

U.S. Department of Education.

Examples

```
data(schoolProgram)
head(schoolProgram)
```

schools	<i>schools Dataset</i>
---------	------------------------

Description

Schools data set (NELS-88) for multilevel modeling.

Usage

```
schools
```

Format

Data frame: 260 rows, 19 variables.

Source

Schools and Staffing Survey (SASS) / NCES.

Examples

```
data(schools)
head(schools)
```

STARplus

STARplus Dataset

Description

STAR participants plus nonexperimental controls.

Usage

STARplus

Format

Data frame: 13,381 rows, 56 variables.

Source

Project STAR, primary investigator Jeremy Finn.

Examples

```
data(STARplus)
head(STARplus)
```

STUDENT

STUDENT Dataset

Description

Student survey metrics and statistics.

Usage

STUDENT

Format

Data frame with applied statistics subsets.

Source

OpenIntro Statistics educational data repository.

Examples

```
data(STUDENT)
head(STUDENT)
```
