

Package ‘famnesia’

October 2, 2026

Title Anonymising Familias Files

Version 0.1.1

Description A 'shiny' application for anonymising files exported from the 'Familias' software for forensic kinship analysis (Egeland et al. (2000) <[doi:10.1016/s0379-0738\(00\)00147-x](https://doi.org/10.1016/s0379-0738(00)00147-x)>). Pedigrees, marker data, allele frequencies and mutation models can be masked or modified, with options for preserving likelihood ratios exactly. The application is built on the 'pedsuite' packages for pedigree analysis.

launchApp	2
Index	3

launchApp	<i>Launch Famnesia</i>
-----------	------------------------

Description

This function launches the Famnesia Shiny application.

Usage

```
launchApp(launch.browser = TRUE, ...)
```

Arguments

`launch.browser` Whether to launch the app in a browser. Default: TRUE.
`...` Further arguments passed to [shiny::runApp\(\)](#), such as quiet, port and host

Value

The value returned by [shiny::runApp\(\)](#)

Examples

```
if(interactive()) launchApp()
```
